PRESENTATION:
Commissioned by the Spanish Group of the Mesozoic Era and the Spanish Group of Sedimentology (Geological Society of Spain, Stratigraphy Commission), the Department of Geology of the University of Valencia (UVEG) and the Department of Earth Sciences and the Environment of the University of Alicante (UA), together with the special collaboration of the Palaeontological Cultural Group of Elche (Palaeontological Museum of Elche, MUPE), have assumed the joint responsibility of organising the XV National Conference on Sedimentology and IV Symposium on Stratigraphy and Palaeography of the Permian and Triassic Systems in Spain, which is to be held in Elche (Alicante) from 12 to 14 September 2005.

The Organisation Committee would like to invite all scientific associations, institutions, bodies and enterprises, together with their members, to collaborate on the organisation of the event through their technical assistance or economic contributions and to take part by presenting papers or attending the scientific debates and participating in the excursions.

The purpose of the meetings is to become the forum for the presentation of research work in the area of sedimentology, on the one hand, and of work related to the Permian and Triassic systems on the other. Similarly, the organisers would like to offer participants the opportunity to carry out field work, visiting outcrops of interest.

CALLED BY:
Spanish Group of the Mesozoic Era and the Spanish Group of Sedimentology (Stratigraphy Commission of the Geological Society of Spain).

ORGANISED BY:
Department of Geology of the University of Valencia. Department of Earth Sciences and the Environment of the University of Alicante.
Palaeontological Cultural Group of Elche (Palaeontological Museum of Elche, MUPE)
